

Sourin Jana

Software Developer

+91-8670042883 | janasourin2017@gmail.com | linkedin.com/in/sourinjana | github.com/sourinjana | Kolkata, India

Professional Summary

Software Developer with 1.5+ years of experience in developing cross-platform mobile applications using Flutter and React Native, along with a strong foundation in Java, Spring Boot, Spring Security, Hibernate/JPA, RESTful APIs, MySQL, SQL, and Microservices. Skilled in designing scalable, secure, and maintainable applications, integrating databases and third-party services, and applying Object-Oriented Programming, Data Structures & Algorithms, Design Patterns, and software engineering principles to solve complex business problems. Proficient in Git, GitHub, CI/CD pipelines, unit testing, Agile/Scrum methodologies, and application deployment on Google Play Store and Apple App Store. Passionate about backend development and building high-performance, production-ready applications.

Professional Experience

Arisu App Solutions Pvt Ltd | December 2024 – Present | Kolkata, India

Software Developer

- Developed high-performance cross-platform mobile applications using Flutter and React Native for Android and iOS platforms, integrating REST APIs and backend services to deliver scalable and reliable solutions.
- Built reusable and maintainable UI components using MVVM and Clean Architecture, implementing structured state management with React Hooks, Context API, Redux, and GetX.
- Integrated REST APIs and Firebase services, including Authentication, Firestore/Realtime Database, and FCM push notifications, ensuring seamless data flow and real-time user engagement.
- Designed responsive, high-performance UI and managed app deployment on Google Play Store and Apple App Store, including build generation, signing, certificates, provisioning profiles, and Agile collaboration using Git.

Projects

Recipe Management System | Java, Spring Boot, Spring Security, JWT, Hibernate/JPA, MySQL, AWS, Swagger, JavaMail, Git, Maven

- Developed a Recipe Management System using Spring Boot and MySQL, enabling user registration, JWT-based authentication, recipe creation, and comment management through RESTful APIs, while implementing validation and Swagger-based API documentation.
- Conducted unit testing, maintained source code using Git, and successfully published the application on Google Play Store, ensuring reliable performance.

Maitys Member | Flutter, Dart, Spring Boot, REST API, Razorpay, MVVM, MySQL, Git, Maven, GitHub

- Built a cross-platform mobile application using Flutter integrated with Spring Boot REST APIs for booking home healthcare services, doctor appointments, and purchasing health products, delivering a responsive and user-friendly UI.
- Implemented Razorpay payment integration for secure transactions, designed and managed MySQL database using Spring Boot (MVC), optimized API performance, and maintained source code using Git.

Technical Skills

Programming Languages: Java, JavaScript, Dart, SQL, Python

Frontend Technologies: React JS, React Native, Flutter

Backend Technologies: Spring Boot, Spring Security, Hibernate/JPA, RESTful APIs, Microservices

Core Concepts: OOP, Data Structures & Algorithms, Exception Handling, Multithreading, Design Patterns, JDBC

Databases: MySQL, Firebase Firestore, Firebase Realtime Database, NoSQL

DevOps & Tools: Git, GitHub, GitLab, CI/CD, IntelliJ IDEA, VS Code, Postman, Swagger

Architecture & Patterns: MVVM, MVC, Agile, Scrum

Other Skills: FCM Push Notifications, Bluetooth Integration, Razorpay, App Store Deployment

Education

Bachelor Of Technology in Computer Science and Engineering

Elitte College of Engineering, Kolkata

2018 – 2022

Percentage: 81.76%
